## **Padded bags**

We have received in November 2022 a considerable price increase on padded bags from the supplier.

Recent cost pressure is due to heavy inflation on energy, raw materials and transportation costs.

Unfortunately we can't absorb the cost effect any longer but have to pass it on to our sales pricing in a following way:

20% increase on all padded bag deliveries commencing from March 1st 2023.

Our Sales Representative will contact you and present the new offer.

We hope you will understand the difficult inflationary situation and look forward to continuing our good cooperation also in the future.

Best Regards

Tuomas Tynnilä  
Sales Director, Nordic and Baltic countries
